

```

#include <stdio.h>
int main()
{
    int id, age, marks;
    printf("Enter the student id: \n");
    scanf("%d", &id);
    printf("Enter the age of the student \n");
    scanf("%d", &age);
    printf("Enter the marks of the student \n");
    scanf("%d", &marks);
    if (age > 20 && marks >= 0 && marks <= 100)
    {
        if (marks >= 65)
            printf("You are admitted \n");
        else
            printf("You are not qualified to be
                    admitted \n");
    }
    else
        printf("Your age and marks are invalid
                \n");
    return 0;
}

```
